Product Information:

The full bin is indicated via the display and the machine switches off automatically.

The automatic reverse eliminates paper jams and ensures a smooth operation.

The LED indicator shows the device's operating status: Power, Overload, Overheat, Bin full, Door open.

The waste container can be easily removed and emptied.

The quiet operating mode minimises noise development at the workplace which is an important consideration for your staff.

An integrated light barrier automatically starts the device when paper is introduced into the feed and it automatically stops after shredding is complete.

For convenience, there are castors on the document shredder so it is easy to move around.

CDs and DVDs, credit cards and loyalty cards can be easily shredded through the separate CD cutting unit. In the separate CD waste container, the shredded material is separated and is therefore already sorted for disposal.

The filling level of the waste container can be seen at all times through the inspection window.
